SKILLS

Cloud & Infrastructure

AWS, Azure, Kubernetes, Docker, Terraform

Platform & DevOps

CI/CD (Github) , IAC, Cloud Migrations, Incident Response

Observability & Reliability

Prometheus, Grafana, Splunk, Logging, Monitoring, Alerting

Languages: Rust, TypeScript

PROJECTS

Auralyze.ai, Instant university interview feedback using AI ✍

- **Co-founded and grew** a university admissions co-pilot platform to help students get into medical and dental school.
- **Raised \$120,000 in funding** from Techstars Atlanta.
- Learnt about institutional VC and **how to manage a start-up from dev and deployment to customer acquisition and fundraising.**

EDUCATION

Msc Systems Engineering,

Loughborough University (Part-time)

Level 4 Software Development, BCS & QA

2020 – 2021

A-Levels & GCSEs

A-Levels Computer Science, Maths, Physics, and Critical Thinking - B, B, B, B
GCSEs (11 A*-As)

PROFESSIONAL EXPERIENCE

V7 Labs, Senior Platform Engineer ✍

12/2025 – Present | UK

- Supported and operated cross-cloud infrastructure across AWS, Azure, and GCP, **ensuring reliable deployment and consistent environments.**
- Designed and developed CI/CD pipelines to automate build, test, and deployment workflows to **improve developer productivity.**
- **Drove enterprise customer acquisition** by supporting SOC 2, ISO 27001, and HIPAA compliance.

Multiverse, Senior DevOps Engineer ✍

02/2025 – 09/2025 | London, UK

- **Lead on key infrastructure projects** supporting Multiverse's AI, data, and software engineering apprenticeship platforms.
- Architect and implement cloud solutions on AWS and Azure to **power personalised learning experiences** for professional apprenticeships.
- Design and maintain infrastructure as code using Terraform to **support scalable deployment** of learning platforms.
- **Implement monitoring and observability** solutions to ensure high availability of business-critical systems.

Legal & General, Senior Platform Engineer ✍

10/2023 – 01/2025 | London, United Kingdom

- Automated **infrastructure provisioning** using **Terraform**, reducing manual overhead and deployment inconsistencies.
- Implemented **observability solutions** (Prometheus, Splunk) to enhance system monitoring and alerting.
- Maintained **critical cloud infrastructure** (AWS, Kubernetes), ensuring **high availability and fault tolerance.**
- Led **incident response efforts**, performing root cause analysis and implementing fixes to improve system resilience.

Anaplan, Platform Engineer ✍

10/2021 – 09/2023 | London, UK

- Developed and maintained a sophisticated CI/CD pipeline using Jenkins, **accelerating project deployment** and **increasing code base stability.**
- Migrated the existing data from company-owned DCs to cloud spokes in AWS and GCP, ensuring data integrity and accessibility, and **reducing operational costs.**
- Configured, deployed, and managed containerized applications on demand, achieving **zero downtime** during core software upgrades.

Bank of New York, Apprentice Software Engineer ✍

02/2020 – 10/2021

Delivered production-ready software via automated testing, cloud deployments, and improved production observability.
